Dialogue between Moby and bondholders commences

The shipping company and the funds have set up a roundtable in the wake of recent events, with the aim of following up on the company's business plan, safeguarding both the bondholders' rights and those of the company, which continues to be fully operational and to carry on its important work of overhauling and investment provided for under the business plan, including in the light of the positive results in the last half-year.

Moby S.p.A.
