The Moby fleet has been at your service to offer you, every day, in every season a style of navigation guaranteed by 130 years of tradition and experience within the maritime transportation field and by official certification from the Italian Naval Registry (RINA). Since 1994, every Moby Ship has been recognized with the "Safety Management System" which assures safety, quality and respect to the environment.

Since our ships Moby Aki, Moby Wonder and Moby Freedom received the "Comfort Class" quality stamp, they are now the first cruise ferries in the world to have received the extremely important Green Star assignment. This is a certificate, which guarantees the highest standard in environmental protection at international level. Besides preventing air and sea pollution, the Green Star requirements also focus, among other things, on the interplay of technology, on the implementation of operational procedures and the professionalism of the team entrusted with protecting the environment.

**MOBY AKI, MOBY WONDER  
AND MOBY FREEDOM  
MEET THESE REQUIREMENTS!**
